Baird Searles is part owner of New York City's Science Fiction Shop and has been keeping track of the small and large screens for F&SF for many years. If you've ever been confused by the many different versions of some sf films, the article below will help sort things out.. He grinned his beguiling grin and picked up my discard. "Ifi very . . . unusual. Have you lived here long, Mr. Maliory?" I became aware of the wind. It was blowing steadily up from the south. I could smell the sea in it. The Project swayed, ever so slightly. But that was all right. The engineers had allowed for the wind. Driscoll spoke into the microphone boom projecting from his helmet. "Red Three, routine check." This would leave an innocuous record in the automatic signal logging system. "Hello, can you hear me now?". "At work. He's a lawyer." We can therefore imagine that at birth, every human individual will have scrapings taken from his little toe, thus attaining a few hundred living cells that can be at once frozen for possible eventual use. When he left the store with his dinner and the beer in a plastic bag, she was already outside waiting for him. "I wasn't lagging at you, young man," she told him, taking the same coolly aggrieved tone. The inner lock door was pulled open, and there was McKillian, squinting into the bare bulb that lighted the lock while she held her shirt in front of her with one hand.. The toastmaster completed his introduction and stepped aside to allow the stocky, white-haired figure in black tie and dinner jacket to move to the podium. Enthusiastic applause arose from the three hundred guests gathered in the Hilton complex on the western outskirts of Washington, D.C. The lights around the room dimmed, fading the audience into white shirtfronts, glittering throats and fingers, and mask like faces. A pair of spotlights picked out the speaker as he waited for the applause to subside. In the shadows next to him, the toastmaster returned to his chair.. There was only one incident: a wealthy merchant came around in a big pink palanquin, got out and. At the Union Hall this evening the Organizer told us that another meeting between the Company and the Union has been arranged and that it's scheduled to take place day after tomorrow. This time, there's going to be a Mediator present? one that the King himself appointed. Maybe now we'll get somewhere. I hope so. We've only been out a week, but it seems twice that long, with nothing to do but hang around the house and with Debbie wondering out loud all the time about what we're going to do when our savings run out. To tell the truth, I'm kind of worried myself. Being a new Union, we don't have a strike fund, and we've got six more weeks to go before we become eligible for unemployment insurance. Yet in one specialized way cloning can take place in even the most advanced animals—even in the human being. "Maybe so. But just because we're colonists doesn't mean we have to behave like rabbits. A pregnant woman will have to be removed from the work force at the end of her term, and we can only afford one at a time. After Lucy has hers, then come ask me again. But watch Lucy carefully, dear. Have you really thought what it's going to take? Have you tried to visualize her getting into her pressure suit in six or seven months?" I was sitting there, wondering how in hell I would find him, when the phone rang again. Miss Tremaine stopped typing and lifted the receiver without breaking rhythm. "Mr. Mallory's office," she said crisply, really letting the caller know he'd hooked onto an efficient organization. She put her hand over the mouthpiece and looked at me. "It's for you? an obscene phone call." She didn't bat an eyelash or twitch a muscle. me to see. It's extremely odd. "I'd love to." She looked at me through her lashes. There was no mistaking the look on her face or its urgency, but he had no time to waste his words. Brushing past her, he hastened to the doorway and she melted back into the night. It's no wonder we jumped at the chance to have him represent us at the bargaining table when. This fertilized egg cell cannot become an independently living organism for some nine months, for it. "Neither one of those facts is so incredible compared to some of the strange things in this world," said Amos. "Why are you the Prince of the Far Rainbow, and why are you a prisoner?" As the four of us stood there staring at him, he raised his eyes still higher, and their blackness seemed to intensify, to throw forth fire. It was the briefest of illusions, for a moment later he turned, climbed back into his palanquin and clapped his hands. "Right, right." And that was all there was to it—he had passed his exam with a score just five points short of the crucial eighth percentile. Which was a tremendous accomplishment but also rather frustrating in a way, since it meant he'd come that close to not having to bother scouting out two more endorsements. Still, with another three months in which to continue his quest and an introduction to Intensity Five, Barry had every reason to be optimistic. Not with angels and pins, alley on the 13th? though the details of the murder didn't seem to fit the pattern. But he was sick, bad an. He led Amos, still tied, to a small door in the wall. But what Corporal Swyley was concentrating on so intently were the minute specks of brighter reds that might or might not have been imperfectly obscured defensive positions, and the barely discernible hairline fragments that could have been the thermal footprints of recent vehicle movements. Take a look at that pipe behind you." Singh turned and saw a pipe about as thick as his arm. It was flexible, and had a swelling in it that continuously pulsed in expansion and contraction. The Project swayed, ever so slightly. But that was all right. The engineers had allowed for the wind. I'd machine is halted while Zorphwar computations are completed. As you may have noticed, it took. When the gag came off, the story came out, and the part of the story the jailor had slept through the. Amos himself was well aware how long he would have hesitated had the question been asked of him. As the seconds passed, he began to fear for Jack's life, and wished he had had a chance to figure some other way to get the mirror out. One minute passed; perhaps they could have tricked the girl into bringing it up herself. Two minutes; they could have tied a string to the leg of a frog and sent him down to do the searching. Three minutes; there was not a bubble on the water, and Amos surprised himself by deciding the only thing to do was to jump in and at least try to save the prince. But there was a splash of water at his feet. Naturally, the ordinary "somatic cells" of an adult human body, with their genetic equipment working only in highly specialized ways, cannot divide into a whole organism if left to themselves. Many body cells, such as those of the muscles or nerves, have become so specialized they can't divide at all. Only the sex cells, eggs and sperm, retain the lack of genetic specialization required to produce a new organism under the proper circumstances. The MacKinnons were not in their blue settee, and neither Freddy the usher nor Madge of the green. 22. Samuel R. Delaty. We cut and I dealt "How long have you been in Hollywood?". The scene outside was deceptively quiet as Colman lifted a flap and peered out, keeping his head well back from the edge of the canopy. The hillside below the post fell steeply away, its features becoming rapidly indistinct in the feeble starlight before vanishing completely into the featureless black of the gorge beneath. There was no moon, and the sky was clear as crystal. When his eyes had adjusted to the gloom, Colman shifted his attention to the nearer ground and methodically scanned the area in which the twenty-five men of the platoon had been concealed and motionless for the past three hours. If they had undercut their foxholes and weapons pits the way he had shown them and made proper use of the rocks and vegetation, they would stand a good chance of escaping detection. To confuse the enemy's tactical plots further, D Company had deployed thermal decoys a half mile back and higher up near the crest, where, by all the accepted principles, it would have made more sense for the platoon to have positioned itself. Auto timed to turn on and off in a random sequence to simulate movement, the decoys had been drawing sporadic fire for much of the night while the platoon had drawn none, which seemed to say something about the value of "the book" as rewritten by Staff Sergeant Colman. "There are two ways to do anything," he told the recruits. "The Army way and the wrong way. There isn't any other way. So when I tell you to do something the Army way, what does it mean?" before her eyes. A For Whatever, DAMON KNIGHT. scale, becoming a shriek, and filled though I am with terror of the Sreen, I am also caught up in fierce. "Ah," said Jack, "the second question is easy to answer, but the first is not so simple. I am a prisoner here because a skinny grey man stole a map from me and put me in the brig so I could not get it back from him. But why am I the Prince of the Far Rainbow? That is exactly the question asked me a year ago today by a wizard so great and so old and so terrible that you and I need never worry about him. I answered him, 'I am Prince because my father is King, and everyone knows I should be.' Then the wizard asked me, 'Why should you be Prince and not one of a dozen others? Are you fit to rule, can you judge fairly, can you resist temptation?' I had no idea what he meant, and again I answered, 'I am Prince because my father is King.' The wizard took a mirror and held it before me. 'What do you see?' he asked. 'I see myself, just as I should, the Prince of the Far Rainbow,' said I. Then the wizard grew furious and struck the mirror into three pieces and cried, 'Not until you look into this mirror whole again will you be Prince of the Far Rainbow, for a woman worthy of a prince is trapped behind the glass, and not till she is free can you rule in your own land.' There was an explosion, and when I woke up, I was without my crown, lying dressed as you see me now in a green meadow. In my pocket was a map that told me where all the pieces were hidden. Only it did not show me how to get back to the Far Rainbow. And still I do not know how to get home." Samuel R. (Chip) Delany has for some time been one of sfs most interesting novelists (Dhalgren, Triton, et cetera) and one of the field's more thoughtful critics (The Jewel-Hinged Jaw: Notes of the Language of Science Fiction). He has not written much short fiction recently, and so we are especially pleased to offer this fresh and magical change of pace. therefore, of the person from whom the somatic cell was taken?
