Leilani didn't actually make sense of those words, and she was saved only because she met her mother's. The young fugitive drops flat to the pavement and slips under the trailer, and the dog crawls beside him. "But we don't even know which Chironians to talk to," Lechat pointed out. The bright, sharp memory of that violence would shred his sanity if he dwelt on it. For the sake of. To the faithful canine, the boy says, "Stay here, girl. I'll be back soon." We got her off and sent them all on their way. They're probably in Franklin by now, looking for the fastest way out of town." "Half an hour." She smiled a promise and winked. Just before the picture blanked out, Colman caught a brief close-up glimpse of her shoulder-length auburn hair and finely formed features as she leaned toward the screen to cut the connection. Amy watched curiously over the top of Cromwell's head as they disappeared from sight. "I wonder why they walk like that when they shout at each other," she mused absently. "Do you know why, Cromwell?" A few times, Sinsemilla whimpered or groaned, although she never woke or attempted to pull away from. "Go, go, go!" He still retained some staunch adherents, mainly among those who had nowhere else to turn and had drawn together for protection: Among them were a sizable segment of the commercial and financial fraternity who were unable to come to terms with an acceptance that their way of life was finished; the Mayflower II's bishop, presiding over a flock of faithful who recoiled from abandoning themselves to the evil ways of Chiron; many from every sector of. "So does that mean you've got it figured?" Jay Eked. "Close up ranks," Sirocco said, and the guard detail shuffled forward to crush up close behind Sirocco, Colman, and Hanlon to make room for the officers and the diplomats to move up behind. Sirocco looked at the Dispatching Officer and nodded. "Open outer hatch." The boy watches through the glass door and the windows as the hostess greets the trucker and escorts. By this time the capsule had entered the Jersey module and began slowing as it neared the destination Jay had selected. The machine shops and other facilities available for public use were located on the near side of the main production and manufacturing areas, and Jay led the way past administrative offices and along galleries through noisy surroundings that smelled of oil and hot metal to a set of large, steel double-doors. A smaller side door brought them to a check in counter topped by a glass partition behind which the attendant and a watchman were playing cribbage across a scratched and battered metal desk. The attendant stood and shuffled over when Jay and Pernak appeared, and Jay presented a school pass which entitled him to free use of the facilities. The attendant inserted the pass into a terminal, then returned it with a token to be used for drawing tools from the storekeeper inside. straight toward the service area. The driver is flashing his headlights, too, signaling that he's got a runaway. Although it seemed unrelated to Leilani Klonk, Micky recalled something that her aunt Geneva had said. He started to say something noncommittal, then stopped and looked up as Jay entered. "Hi, Jay. How was the movie'. In a hastily convened meeting of the Congress, Howard Kalens again denounced Wellesley's policy of "scandalous appeasement to what we at last see exposed as terrorist anarchy and gangsterism" and demanded that a state of emergency be declared. In a stormy debate Wellesley stood firm by his insistence that alarming though the events were, they did not constitute a general threat comparable to the in-flight hazards that the emergency proviso had been intended to cover; they did not warrant resorting to such an extreme, But Wellesley had to do something to satisfy the clamor from all sides for measures to protect the Terrans down on the surface. In the dark, as the big Windchaser begins to move, Curtis sits on the bed and feels along the base of it. that hand is a human ear. "She's tough, too. She knows what she can handle." Padawski and his followers had somehow shown up on the far side of the Medichironian, which was only sparsely settled, and seemed to be settling in as bandits in the hills. What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, Three Chironians, including a fifteen-year-old girl,

Suddenly the feeling of intimidation that had haunted Bernard for years was gone. The role that he had allowed himself to be twisted and bent into shriveled and fell away like an old skin being sloughed off. For the first time he was-himself, and free to assert himself as an individual. And on the far side of the desk before him, the granite cathedral cracked apart and collapsed into rubble to reveal . . . nothing inside. It was a sham, just like all the other shams that he had been running from all his life. He had just stopped running.. "What about the ameba?".Colman shrugged. Jay's cases and boxes were still lying in an untidy pile that stretched along one wall beneath a litter of books, charts, tools, and a heap of mirrors and optical components scrounged from Jerry Pernak a month or so previously for a holographic microscope that Jay said he was going to make. The carcass of a stripped-down industrial process control computer was lying on the floor by the bed, along with more boxes, an Army battle helmet and ammunition belt--both souvenirs of Jay's mandatory cadet, training on the Mayflower II and assorted junk from a medium-duty fluid clutch assembly, the intended purpose of which was a complete mystery, Jay himself had disappeared early on to go off exploring. Bernard shrugged to himself. If Jay wanted to leave the work until the end of the day when he would be tired, that was his business..Clem frowned and brought a hand up to his chin. "Depends what you mean by authority," he said. "I organize the regular engineering crew of the ship and supervise the maintenance. I suppose you could say that's authority of a kind. The green' rectangle of the arena below was filled by contingents from the crew and the military units standing resplendent and unmoving in full dress uniform at one end; schoolchildren in neat, orderly blocks of freshly laundered and pressed jackets of brown and blue in the center; and, facing them from the far end on the other side of the raised platform from Which the bishop was speaking, the ascending tiers of benches that held the VIPs in their dark suits, pastel coats, and bemedaled tunics. Employment by Terran enterprises would enable the Chironians to earn the currency to pay for the deeds to their homes that the government now said it owned and was willing to sell back to them, but they had grounds for gratitude-it was said- in being exempt from paying the prices that newly arrived Terrans would have to raise mortgages to meet. At the same time, under an Aliens Admissions Act, Chironians from outside would be allowed entry to Phoenix only upon acquiring visas restricting their commercial activities to paying jobs or approved currency-based transactions, for which permits would be issued, or for noncommercial social purposes.
