The first person I met was the thin grey man, and with him was his large black trunk in which, he said, was his nearest and dearest friend. He said if I would work for him and carry his trunk, he would pay me a great deal of money with which I could buy a ship and continue my search. He told me that he himself would very much like to see a woman worthy of a prince. 'Especially,' he said, 'such a colorful prince as you.' I carried his trunk for many months, and at last he paid me a great deal of money with which I bought a ship. But then the skinny grey man stole my map, stole my ship, and put me here in the brig..competition and closed them again. Critics tend to be an irritable lot Here are some examples:."Well," said Amos, "if you help get us to the top of the mountain, we will let you look into the fragment of the mirror." Then he added, "which is more than your friend the wizard did, apparently." Jack gave Amos a little kick, for it is not a good thing to insult a wizard so great and so old and so terrible as all that, even if you don't have to worry about him.."We had a back-up pilot, of course. You may be surprised to learn that it wasn't me. It was Dorothy Cantrell, and she's dead. Now I know what everything does on this board, and I can cope with most of it easily. Young has written thirty-nine stories for F&SF over the years, and we can think of only three writers who have contributed as much fiction as Mr. Young (Poul Andersen, A warn Davidson, and Ron Goulart). A Robert Young story is always a pleasure because its high quality is as predictable as its subject matter is unpredictable. Mary Lang shook her head decisively..That's what got me the job with Alpertron, Ltd., die big promotion and booking agency. I'm on the concert tour and work their stim board, me and my console over there on the side of the stage. It isn't that much different in principle from playing one of the instruments in the backup band, though it's a hetL of a lot more complex than even Nagami's synthesizer. It all sounds simple enough: my console is the critical link between performer and audience. Just one glorified feedback transceiver: pick up the empathic load from Jain, pipe it into the audience, they react and add their own load, and I feed it all back to the star. And then around again as I use the sixty stim tracks, each with separate controls to balance and augment and intensify. It can get pretty hairy, which is why not just anyone can do the job. It helps that I seem to have a natural resistance to the sideband stopover radiation from the empathic transmissions. "Ever think of teaching?" said the school voc counselor. "No," I said. Lang worked them harder than ever, making up for the lost time..His first elation fizzled out and he was left with his usual flattened sense of personal inconsequence. Tucking the license into his ID folder, he felt like a complete charlatan, a nobody pretending to be a somebody. If he'd scored in the first percentile, he'd have been issued this license the same as if he'd scored in the tenth. And he knew with a priori certainty that he hadn't done that well.
