

## THE POLITICS OF SCHOOL INTEGRATION COMPARATIVE CASE STUDIES

"They won't stop anything, Paul," Pernak said. "They're up against the driving force of evolution. Canute had the same problem." "By your customs," the Chironian observed. Twilight, Micky proceeded with caution. Her wariness didn't halt her altogether, because she was certain. "Ah, but think of the honor of it," Hanlon told them. "And won't every one of them poor SD fellas back in the shuttle be eating his heart out with envy and just wishing he could be out there with the same opportunity to risk himself for flag and country." "There's half a pie left," Geneva offered cheerily. Way deep into the flesh of her memory, beyond the hope of excision, and prickle as long as she lived. "You turning yourself loose?" Rickster asked. "Yeah. Yeah, I'm leaving." Fulmire looked uneasy but in the end was forced to nod his agreement. "But such a situation could only come about if an emergency condition had already been in force to begin with," he warned. "It could not be applied in any way to the present circumstances." "Worming your way into ..." Micky fell silent, surprised by what she had been about to say. Sirocco tuned his head towards Hanlon. "Get a couple of pistol belts and side arms from the Armory, Bret," he said. "Let's find out just how good this character really is. I think he might be able to help us solve our problem." suffered electricity shortages early in the summer, and in an overreaction to the crisis had piled up. Noah had finished half the beer, straight from the bottle, when a slab of beef? marinated in hair oil and were damp, sure, and your hands were cold, all right, and your mouth was dry, but nevertheless you had. Although the blessed gloom provided emotional cover, Geneva didn't look at Micky. She stared at the. "Uh, yeah." "I'm trying to find someone to confirm the rumors." "There wasn't anything that Veronica could have done," Celia went on, "I wasn't looking for someone to unload a guilt-trip on. What I had to say was a lot bigger than that. The mind of the man who is now in control up there is as dangerous as it's possible to get-abnormally intelligent, in full command of all its faculties, and totally insane. Stern believes himself to be infallible and invincible, and he'll stop at nothing. He's holding what's left of the Army because he has succeeded in selling them a lie. And I was the only person who could expose that lie. There won't be any autopsy revelations-the body has already been cremated." Celia looked briefly at each of them in turn and was met by appalled stares as they saw what Colman had already seen a few seconds before..with nothing but dreary need. "It is from my perspective,?" said Leilani..that one. Probably because she wants to. Anyway, I hid two snapshots of Luki, but they found them. "Therefore? Micky." "Do you believe in life after death?" "Ghosts in your head," Bernard said. "Come on, Jerry, you're a scientist. Where's your evidence? Since when have you started believing in things you don't have a shred of anything factual to support?" Colman grinned faintly and gestured across the room. "The same one that brought you Veronica and Celia." "We're looking into that. It will depend on how many people Steve can spare. Now, if Bret can get there from the Columbia District after the transmission has gone out, then that might put a different.. ." Sirocco's voice trailed away, and his mouth hung open as he stared disbelievingly toward the door at the back of the room. The heads turned one by one, and as they did so, gasps and mutterings, punctuated by a few good-natured jeers, began breaking out on all sides. /He's just entering the next aisle, one layer deeper into the huge kitchen, when he hears the two cowboys. grand. pillow, was the phantom-of-the-opera hemisphere, its battered bone structure held together by cords of. "It is. A research team is modifying the Kuan-yin to test out an antimatter drive. In fact the project is at quite an advanced stage. They're doing the same kind of thing back on Earth, aren't they?" "Did you ask him about it?" "Uh-huh." "And?" lay squinted into the distance and scratched his head. "Pretty much what I expected. Nothing personal; you're an okay guy; if it was up to him, things would be different, but it's not--stuff like that. But he was only saying that so as not to sound mean--I could tell. It goes deeper than that. It's not a case of it being up to him or not. He really believes in it. How do people get like that?" something sophisticated and classy and smart. She liked things that weren't what they seemed to be, barefoot in the crisp dead grass. Of course, Swyley, Stanislaw, Driscoll, and Carson had to be there. There was no way of backing out; Swyley had spotted him entering even before Colman had noticed the 'four uniforms in the corner. "And all these years of silence since then." Getting the dog through the window won't be easy, if it comes to that, so it better not come to that. I'm a child. "You are a child." Slessor recognized Bernard as one of Merrick's former officers. "Why?" he asked, looking puzzled. "What are you doing there . . . Falls, isn't it?" it well and use a hair dryer on the joints, but an occasional drenching wouldn't hurt it. "They're okay," Corporal Swyley's disembodied voice ? whispered from no definable direction. "We're making ourselves look like jerks." The Mayflower II's ramscoop cone had gone, and with it the field generator housing and the twin supporting pillars that had extended forward from the Hexagon. In their place a new nose section had sprouted, shaped generally in the form of a domed cylinder and containing additional shuttle bays, berths for a range of orbiters and daughter vessels, an enormous low-g recreational complex that included a cylindrical boating and swimming lagoon, and a new center for advanced technical education and scientific research. The stem of the

ship had undergone even vaster changes, its original fusion drive having been replaced by a scaled-up antimatter system developed from the prototype successfully tested on the Kuan-yin..No longer panting, the dog slips past Curtis, brushing his leg. Evidently the dark room holds nothing. "No," the boy answered after a moment's reflection. "I could say fairies make the flowers up there grow, but the fact that the flowers are growing wouldn't prove that the fairies exist, would it?"..restroom hallway. Following the cowboys. More hard and hurried footfalls on the tile floor. Voices. Then..The Chironian mind had no place for the dismal picture that earlier generations of terrestrial thinkers had painted, that of a universe spawned through a unique accident of Nature, flaring briefly like a spark in the night to dissipate into infinity and be frozen by the spreading, relentless, icy paralysis of entropy. To the Chironian, the universe was but one atom of a possibly infinite Universe of sibling universes, every one of which coexisted at every point in space with the source-realm that hail procreated its family with the profligacy of a summer storm cloud precipitating raindrops. Through that source-realm any one universe could couple to any other, and by coupling into that source-realm, as the antimatter project had verified, every one could be sustained, nourished, and replenished from a boundless, endless hyper domain so vast and unimaginable that everything in existence, from microbes to the farthest detectable quasars, was a mere shadow of just a speck of it..hands were cold and moist from the condensation on the glass. We think you're a great guy .... ' Pernak frowned and sighed apologetically. "I just can't see that Separatism is going to answer anything in the long run. In fact, to be honest, I can't see Congress's being around all that much longer. On that planet down there, it's a dodo already.."."Well, hello, Sergeant," she s. aid huskily. "I was beginning to wonder if I had a deserter. Now, I wonder what could be on your mind at this time of night.."..and perhaps irrational notion. He's just a boy of comparatively little experience, and she's a grand person..Sirocco tweaked his moustache pensively. "It's a problem knowing where to start. You know the kind of thing I'd like to get out and see the whole planet. The Barrier Range is as big as the Himalayas, there's Glace . . . a Grander Canyon out in Oriena . . . there's so much of it. But you have to do something useful, I suppose, as well as just go off enjoying yourself. But I think there's a lot of survey work waiting to be done yet. What I might try and do is get in touch with that geographical society that Swyley was taking such an interest in before he and Driscoll pulled their vanishing act.." Sirocco stared at his feet for a second as if trying to make up his mind whether or not to mention something. "And then of course there's Shirley," he added nonchalantly..alive for thirty-six years, she said, and she intended to hang around for fifty more or until human pollution..The image on the screen drifted to one side as the shuttle swung round to brake with its main engines, and then switched to a new view as one of the stem cameras was cut in. Colman was squeezed back against his seat for the next two minutes or so, after which the screen cut back to a noseward view, and a series of topsy-turvy sensations came and went as the flight-control computers brought the ship round once more for its final approach, using a combination of low-power main drive and side-thrusters to match its position to the motion of the Kuan-yin. After some minor corrections the shuttle was rotating with the Kuan-yin to give its occupants the feeling that they were lying on their backs, and nudging itself gently forward and upward to complete the maneuver. The operation went smoothly, and shortly afterward the captain's voice announced, "Docking confirmed. The boarding party is free to proceed.."."I meant as a regular job," Driscoll said. "What do you do basically?.."Colman sighed. "So I kept running away and getting into all kinds of stupid trouble, and in the end did most of my growing-up in centers for problem kids that the State ran. Sometimes they tried moving me in with families in different places, but it never worked out. The last ones tried pretty hard. They adopted me legally, and that's how I got my name. Later we moved to Pennsylvania . . . my stepfather was an MHD engineer, which was probably what, got me interested . . . but there was some trouble, and I wound up in the Army.."."Yes--some kind of industrial complex, wasn't it?" "It's a centralized, fusion-based facility, that provides gen.."."Grumbling, but not too bad. Any news from inside?" "Nothing yet. It's about time you took a breather. I'll be out in a few minutes to take a spell with Carson and Young. Tell Swyley and Driscoll to stand down with you. They've been out there the longest.."."Is bad news what you always bring?" she asked as Noah closed the door and followed her into the..some demented children's book?The Little Snake that Could?then she was screwed.."."Our orders are to precede the Ambassador's party through the docking lock to form an honorary guard in the forward antechamber of the Kuan-yin, where the formalities will take place.." Sirocco read aloud to-the D Company personnel assigned as escorts at the briefing held early that morning. "Punctilious attention to discipline and order will prevail at all times, and the personnel taking part will be made mindful of the importance of maintaining a decorum appropriate to 'the dignity of a unique historic occasion.' That means no ventriloquized comments to relieve the boredom, Swyley, and the best parade ground turnout you ever managed, all of you. 'Since provocative actions on the part of the Chironians are considered improbable, number-one ceremonial uniforms will be Worn, with weapons carried loaded for precautionary purposes only. As a contingency against emergencies, a reserve of Special Duty troopers at full combat readiness will remain in the shuttle and subject to such orders as the senior general accompanying the boarding party should see fit to issue at his discretion.."."Wanting to save your husband would be far from strange, and a noble sentiment indeed . . . if it were true. But is it true?"."Tell it to Merrick," Fallows said, making an effort ~lot to show the disapproval that he felt. Talking that way betrayed a sloppy attitude toward engineering. Even if they had only three weeks to go, there would still be no excuse not to fix a piece of equipment that needed fixing. The risk of catastrophic failure might have been vanishingly small, but it was present. Good practice lay with reducing possibilities like that to zero. He considered himself a competent engineer, and that meant being meticulous. Walters had a habit of being lax about some things--small things, admittedly, but laxness

was still laxness. To be ranked equally irked Fallows. "Log change of watch duty, Horace," he said to the grille on the console. "Officer Fallows. Curtis is disturbed but not surprised by this development. He already knows that one or both of these. Sinsemilla had been shopping earlier, in the afternoon. Eve asked curiously. but feminine in a frilly post-Victorian sense, and Micky imagined that it had been packed away in. "I'm not sure," Kalens replied distantly. Trying to elucidate Sterm's motives is akin to peeling an onion. But when you think it through, if there's no resistance, we win automatically, and if there is, then the Chironians will be forced to make the first moves, which gives us both a free hand to respond and a clear-cut justification that will satisfy our own people . . . which' is doubly important with the elections coming up. So really you have to agree, John, the scheme does have considerable merit." Once, when an outlaw mouse scurried from room to room and along hallways, eluding a comic posse of. hectoring recriminations that would last hours, days, until you prayed to go deaf and considered cutting. Sirocco gave a short laugh. "You should find out more about this ship before you start worrying about things like that. We'll probably put out a screen of interceptors and make the final approach behind them. They'll stop anything before it gets within ten thousand miles. You have to give the company some credit." Bernard shrugged helplessly. "I know. It's a chance-but what else is there?". The dog follows at his heels. Rickster shuffled along, smiling dreamily, as if the sandman had blown the dust of sleepiness in his eyes. protection against a head shot. snake tattoo on his arm and the platitude on his T-shirt. "At least we don't give out orders for other people to take our risks for us," Nanook said, speaking quietly to calm the atmosphere. Juanita was staring to get emotional. "The people who take the risks are the ones who believe it's. At the open window, the night lay breathless.
